## About

An eco-friendly, learner-centric institution of excellence dedicated to developing global citizens equipped with knowledge, moral values, cultural understanding, and devotion to tolerance who will lead at the national and international stage.

## Our online learning journey

Greenwood has been using online tools and curriculum for quite some time. All students are using devices and we are mostly paperless now. Numerous platforms such as Frog OS, Achieve 3000, and online textbooks are used for most subjects.

## Why Education Perfect (EP)

Greenwood started using Education Perfect during one of the Global Learning Festival, an exciting online competition in 2021, when coordinators and HOD encouraged the middle school classes to participate. Education Perfect has been a godsend as it saves a lot of screen time and has the blessing of very efficient live progress tracking. An extremely useful function when learning can be at times 100% remote.

## My personal experience of (EP)

Students have thoroughly enjoyed EP and have often even begged to complete more of it in class. Some of them especially really enjoy the game "Dash" at the end of an assignment. This gamified aspect can be turned on or off for students.

As a teacher, I love the content and convenience EP provides however I particularly prefer the flexibility that it allows me in the classroom. I would use EP to support or extend the topic I have just taught the class and sometimes I would do it in reverse and start the lesson with the students using EP. EP really provides me with flexibility within my teaching and all staff use EP differently. I still have a lot to learn about EP, and I know that any issues can be managed by customizing lessons. Happily, we are able to contact our teaching consultant Myles and the other members of the EP team at any time to support via email or school visits.

## "Education Perfect has been a godsend"

**Moniba Mehboob**

English Teacher

Greenwood International School

---

### Impact

- EP has allowed teachers to easily track the engagement and work habits of the student
- Improved teacher's confidence in delivering online and blended learning
- Allowed teachers to easily deliver personalized and differentiated lessons
- Improved literacy and numeracy and allowed students to quickly receive meaningful feedback
- Improved student curiosity and self-learning alongside personalised learning
